

**Instruction for extracting DataLink 2.x template files for the Advantage 1200 scanner**  
(NOTE: These templates can only be used with DataLink 2.x)

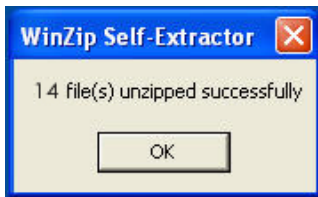

1. Find the file you just downloaded. Double click the Winzip Extractor (file name: *ALL ADV 06-05 TEMPLATES.exe*).

2. When the Winzip Extractor window opens click the browse button

3. With the browse window open, double-click on the following folders until you get to the "Templates" folder (C:\Program Files-Program Files-Apperson-DataLink-Templates).
4. Once you open the "Templates" folder click on the UNZIP button on the top right and the program will automatically extract the new files into that folder.
5. When its done extracting a window will show the number of files that were properly extracted, click the OK button on that window and the close button in the middle of the Winzip window.

6. After you close the Winzip window the files should be installed with your DataLink files.
7. Open the DataLink program, the new files will be available when you click on the Load Templates option from the File menu.
